

Stainless Steel Lift-Assist Torque Hinge

The HG-TLAJ is a compact stainless steel hinge for external surface mount on top-opening lids.

This hinge is available in two sizes and is optimal for food machinery, medical lab, analytical, and factory automation equipment. With the HG-TLAJ, lids can be operated lightly to open or close with a lift-assist free stop. This stainless steel torque hinge can be easily and quickly cleaned.

The cover HG-TLAJC (sold separately) provides a clean appearance to blend in with the aesthetics of machinery and is available in white.
